

Message from the President

Aiming to Be a Trusted Company Throughout the World

The Ricoh Group has rolled out a variety of initiatives to assist in the development of a sustainable society. In the area of information security, the Group, as a corporate citizen and a member of the global information society, complies with all laws and standards and works to bring about a better society.

As a global supplier of digital multifunctional printers (MFPs) and printers, which are used by tens of thousands of people, it is our responsibility to ensure information security for the products we sell.

In the sphere of IT-aided business management, we try to balance quick decision-making and efficient business execution on one hand and the safe use of IT in a secure environment on the other.

The purpose of this Information Security Report is to increase our stakeholders' awareness of Ricoh initiatives for improved information security. I hope you will take advantage of this opportunity to become familiar with our efforts.

June 2007

Shiro Kondo

President and Chief Executive Officer
