

More and more Group Companies in Japan and Overseas Obtaining ISMS Certification

We report here on the key activities and the action status of Ricoh Group ISMS. We have obtained unified certification since December 2004. In fiscal 2010, we passed our second renewal audit for the Group's unified certification, and a total of 85 companies - 41 companies in Japan and 44 overseas - currently hold certification. (As of October 2010)

Group Companies in Japan with ISMS Certification

In Japan, 41 companies hold ISMS certification. This includes the Ricoh headquarters, nationwide marketing subsidiaries, service, logistics and manufacturing companies, and all major Group companies. Audits were conducted in each company and organizational unit.

In 2007, the Ricoh Group adopted the Ricoh Family Group Information Security Measures (RFG ISMeasures) that comply with ISO27001, and through revisions that reflected comments, requests, and changes in the environment, we have eliminated inter-organizational variations in information security measures and maintained them at stable levels.

Group Companies Overseas with ISMS Certification

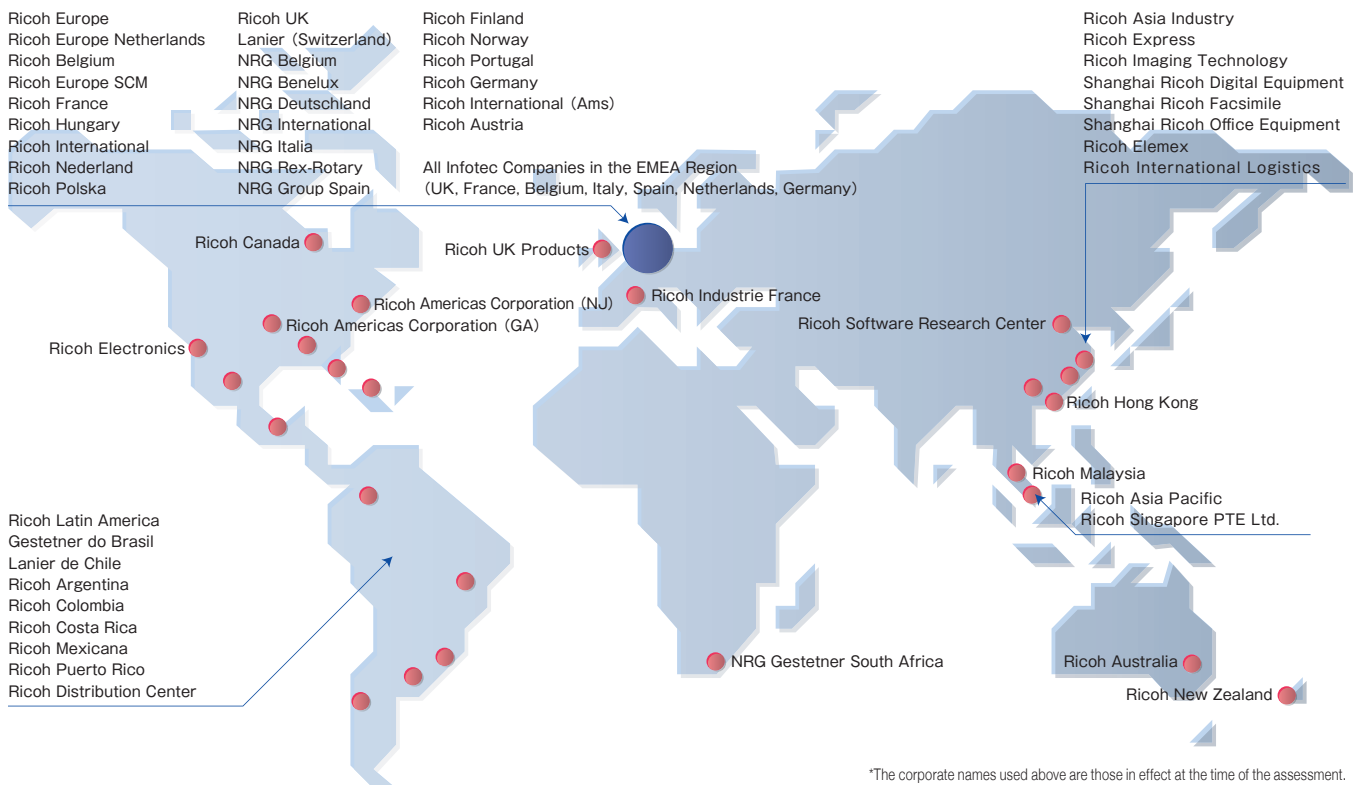

For overseas companies, Ricoh Austria GmbH passed its audit and newly certified in 2010. A total of 44 companies held ISMS certification as of October 2010.
