Releases Ricoh's first reconditioned digital full-color MFPs, the imagio MP C3500RC/C2500RC series (Japanese market only)

Reconditioning products is an important resource-recycling project at Ricoh. Products are reconditioned mainly by using parts that meet our quality assurance standards. The imagio MP C3500RC/C2500RC series was Ricoh's first reconditioned digital full-color MFP series. While attaining an average 80% mass content of reused parts, these models met quality standards on par with newly manufactured products*.

*Products wholly composed of newly manufactured parts or like-new products containing some remanufactured parts

imagio MP C3500RC

Used copies are disassembled, have their parts cleaned, then reassembled
