The Expansion of Ricoh’s Inkjet Technology

*Pushing the boundaries of inkjet to open new worlds*

Ricoh’s inkjet technology is based on more than 40 years of continuous research and innovation. It started out as technology to be used in office printing. Now it is used in numerous commercial areas. It has even developed into industrial solutions, deployed in a variety of applications encompassing food, clothing and housing. Ricoh keeps expanding the printing possibilities, delivering new value and new experiences for our customers across the globe.
